PROFESSIONAL SUMMARY

Senior Flutter Developer with 5 years of experience building and shipping 25+ cross-platform apps. Deeply familiar with Clean Architecture and the Flutter ecosystem, with a history of leading small teams and improving app performance by 30%. Experienced in handling complex integrations like real-time video (Agora), on-device ML (ML Kit), and GraphQL. Focused on building maintainable systems that solve real business problems and keep users engaged.

EDUCATION

Bachelor of Computer Science, University of Gujrat, Lahore Sub Campus

2017 - 2021

SKILLS

Languages & Frameworks	Flutter, Dart, Java, Python, C++, SQL
State Management	Riverpod, GetX, Provider, BLoC
Architecture	Clean Architecture, MVVM, MVC, SOLID Principles
Mobile Technologies	Firebase, REST APIs, GraphQL, Agora SDK, ML Kit
Tools & DevOps	Git, CI/CD (GitHub Actions), Postman, Figma, Android Studio
Engineering Practices	Unit/Widget Testing, Profiling, Agile/Scrum, Code Reviews

EXPERIENCE

Senior Flutter Developer

January 2025 - Present

United Software and Technologies International (USTI)

Lahore, Pakistan

- **Stabilized a high-traffic app** by reducing daily crashes from 30,000 to under 7,000; achieved this by implementing global error handling, fixing push notification logic, and optimizing API request flows.
- **Leading the ground-up rebuild** of the "myUTS" application, migrating from an unorganized codebase (mixed GetX/Provider/SetState) to a modern, Feature-First Architecture using Riverpod.
- **Improved UI rendering performance** by refactoring complex screens into optimized sub-widgets, significantly reducing frame drops and memory usage.
- **Restructured the API layer** with robust try-catch mechanisms and interceptors, ensuring the app remains functional during network failures or backend timeouts.

Senior Flutter Developer

August 2021 - December 2024

CMC M-Tech Sol

Lahore, Pakistan

- **Managed** the end-to-end development of 25+ apps using Provider and GetX, keeping a 99.9% crash-free rate across the portfolio.
- **Introduced** performance profiling and better code review standards, which made the team's development cycle roughly 20% faster.
- **Helped junior developers** grow by providing technical guidance on architecture and state management, making project onboarding much smoother.

Flutter Developer

February 2021 - July 2021

Elite International Education Group Inc.

Lahore, Pakistan

- **Built** core features for an education platform, focusing on real-time data sync using Firebase.
- **Cleaned up** widget tree structures and asset management, which cut the app's initial load time by 20%.

SELECTED PROJECTS

myUTS — *Flutter, Riverpod, Google Maps, Firebase*

- Fixed critical bugs and updated dependencies for a university app to ensure it works perfectly on the latest iOS and Android versions.

EFS Attend — *Flutter, Firebase ML Kit, SQLite*

- Built a facial-recognition attendance app that achieves 99% accuracy and works offline using custom image caching.

Sehat Sahoolat — *Flutter, Agora SDK, GetX, Firebase*

- Created a healthcare app that supports low-latency video calls and secure access to medical records.

RF Pro CP — *Flutter (Tablet), Bluetooth Integration, Firebase*

- Developed a POS system that handles real-time Bluetooth printing and coordinates orders between staff in busy restaurant settings.
